School Board Reports

The School Board met on Thurs., April 16,1970, with the Commonwealth's attorney to assess the events of the past week. The Board examined its legal obligations and reaffirmed its responsibility that public schools in the county will be operated efficiently and without disruption.

It was agreed that principals and teachers must take the appropriate action necessary to prevent interference, by students and others, with the orderly operation of the schools and to assure the safety and welfare of the pupils. The Board reviewed existing rules and regulations and approved new procedures adopted by the principal of the Appomattox County High School.

Recognition was also given to the apparent misunderstanding regarding the changing of school signs, Problems of matching letters and delays in receiving estimates from sign companies postponed replacement of existing signs with the new school names, as authorized by the Board at their January meeting.

While legally charged with the operation of the public schools in the county, the Board believes that good public education is dependent upon the understanding, support, and cooperation of each citizen in the county and reminds citizens that the School Board meetings are open to the public.
